Subject Index

Ability estimation, 505–516
Adaptation, 197–201
ADHD, 559–568
Adherence, 67–79, 265–274, 287–293, 323–333, 355–361, 383–392
Adherence reliability, 355–361
Adjustment, 5–15, 347–353
Adolescent mothers, 529–534
Adjustment, psychological, 29–39
Adjustment, social, 185–190
Adolescents, 17–28, 67–79, 233–241, 265–274, 281–286, 363–373, 383–392, 485–493, 495–504
African-American children, 463–472
AIDS, pediatric, 355–361
Appearance, 463–472
Arthritis, juvenile rheumatoid, 5–15, 17–28, 29–39, 213–221, 275–279, 347–353
Arthritis, chronic, 29–39
Assessment, 375–382
Assessment, psychological, 383–392
Asthma, 323–333, 495–504, 519–528
Attrition, 519–528

Behavior, 403–411, 559–568
Behavior, parenting, 447–452
Behavior problems, 59–65, 251–263, 315–321
BG estimations, 203–211
BNBAS, 529–534
Bone marrow transplant, 223–231
Bowel habits, 375–382
Brain, pediatric tumor, 299–307
Brain, traumatic injury, 251–263
Breast-feeding, 529–534

Calcium intake, 335–345
Cancer, pediatric, 447–452
Cancer survivors, 281–286
Caseness, 251–263
Cerebral palsy, 197–201
Child behavior problems, 315–321
Child-rearing practices, 275–279
Child self report, 579–588
Child vulnerability, 185–190
Childhood chronic illness, 347–353
Children, 17–28, 251–263, 323–333, 413–422, 423–432, 463–472, 505–516, 535–546, 547–558
Children's Somatization Inventory, 413–422
Chronic arthritis, 29–39
Chronic conditions, 393–401
Chronic illness, 185–190, 213–221, 275–279, 383–392, 579–588
Clinical trials, 159–167
Cognition, 569–578
Cognitive functioning, 299–307
Compliance, 67–79
Concepts of illness, 323–333
CONSORT statement, 159–167, 169–171, 173
Constipation, 375–382
Consultation-liaison, pediatric, 423–432
Coping, 197–201, 423–432, 485–493
CSHCN Screener, 393–401
Cystic Fibrosis, 535–546

Depression, 197–201, 233–241
Diabetes, 265–274, 287–293, 485–493, 569–578
Diabetes, Type 1, 67–79, 203–211
Diagnosis, 375–382
Diary, 363–373
Disabilities, 197–201, 233–241
Discrepencies, 265–274
Disease severity, 17–28
Distress, maternal, 447–452
Duchenne muscular distrophy, 473–484

Encopresis, 375–382

Facial expression, 47–57
Families, 5–15
Family functioning, 59–65, 251–263, 473–484
Family stress, 175–183
Family system theory, 347–353
Functioning, cognitive, 299–307
Functioning, family, 59–65, 251–263, 473–484
Functioning, social, 17–28

Gender differences, 569–578
Genetic testing, 135–145
Genetics, psychiatric, 135–145
Glycemic control, 67–79

Health care, 547–558
Health care needs, special, 393–401
Health-related quality of life, 535–546
Hemophilia, 175–183
Hereditary cancer syndromes, 135–145
HIV, 175–183, 355–361
Hong Kong, 67–79
Hospitalization, 423–432
HSCT, 223–231
Hyperglycemia symptoms, 203–211
Hypoglycemia symptoms, 203–211

Illness, chronic, 185–190, 213–221, 275–279, 347–353, 383–392, 579–588
Illness, concepts of, 323–333
Illness intrusiveness, 453–462
Illness representations, 485–493
Immune compromise, 175–183
Infants, preterm, 403–411
Injury, 505–516
Intervention, 519–528

Juvenile, rheumatoid arthritis, 5–15, 17–28, 29–39, 213–221, 275–279, 347–353
Juvenile rheumatic disease, 453–462

Knowledge, 335–345

Massage therapy, 403–411
Maternal distress, 447–452
Medication adherence, 355–361
Mentoring, 123–134, 309–314
Meta-analysis, 29–39

Mothers, 197–201
Multisystemic therapy, 287–293, 295–297
Muscular distrophy, Duchenne, 473–484

Negative life-events, 579–588
Neonates, 529–534

Obesity, 463–472
Osteoporosis, 335–345
Overprotection, 213–221

Pain, 47–57, 363–373
Parent-adolescent agreement, 393–401
Parent-child agreement, 579–588
Parental beliefs, 185–190
Parental perceptions of child vulnerability, 185–190
Parental stress, 473–484
Parents, 5–15, 559–568
Parenting, 213–221, 275–279, 447–452, 505–516
Pediatric, 223–231
Pediatric AIDS, 355–361
Pediatric asthma, 519–528
Pediatric brain tumors, 299–307
Pediatric cancer, 447–452
Pediatric chronic illness, 29–39
Pediatric consultation-liasion, 423–432
Pediatric primary care, 315–321
Pediatric psychologist training, 85–98, 109–113
Pediatric psychology, 123–134, 433–441
Peer relationships, 17–28, 243–249
Perception, parental, 185–190
Perception, self, 233–241
Physical activity, weight-bearing, 335–345
Posttraumatic stress, 281–286
Predoctoral internship, 433–441, 443–445
Preterm infants, 403–411
Prevention, 147–155
Primary care, 315–321, 547–558
Professional training, 433–441
Psychiatric genetics, 135–145
Psychological adjustment, 29–39
Psychological assessment, 383–392
Psychologist training, 85–98, 109–113
Psychosocial, 175–183, 495–504

Quality of life, 233–241, 535–546

Rating scale, 559–568
Regimen adherence, 383–392
Research training, 123–134
Risk factors, 251–263, 495–504

SCHIP, 393–401
School attendance, 185–190
School psychology, 147–155
Screening, 315–321
Self-efficacy, 67–79, 335–345
Self-esteem, 463–472
Self perception, 233–241
Sexual behavior, 243–249
Sexually transmitted infection, 243–249
Siblings, 281–286
Sibling donor, 223–231
Sickle cell disease, 59–65, 363–373
Social adjustment, 185–190
Social functioning, 17–28
Social support, 5–15, 335–345
Social-skills training, 299–307
Somatization, 47–57
Somatization symptoms, 413–422
Special health care needs, 393–401
Stress, family, 175–183
Stress, parental
Stress, perceived, 447–452
Stress, posttraumatic, 281–86
Stress, transactional and coping, 453–462
Stress, treatment-related, 447–452
Structural modeling, 47–57
Supervision, 505–516
Systems, 147–155

Temperament, 47–57, 505–516
Tests, 375–382
Theoretical orientation, 115–122
Therapy, massage, 403–411
Therapy, multisystemic, 287–293, 295–297
Title XXI, 393–401
Tobacco, 495–504
Training, 115–122, 147–155
Training, internship, 105–107
Training, pediatric psychology, 81–83, 85–98, 99–103, 109–113, 123–134, 135–145
Training, professional, 433–441, 443–445
Training, research, 123–134
Training, social-skills, 299–307
Transactional stress and coping, 453–462
Treatment adherence, 287–293
Treatment-related stress, 447–452
Traumatic brain injury, 251–263
Tumors, pediatric brain, 299–307
Type 1 diabetes, 67–79, 203–211

Utilization, 547–558

Validation, 535–546

Weight gain, 403–411
Weight-bearing physical activity, 335–345
Well-being, 485–493

Youth, 175–183
